

Heart Anatomy & Blood Flow

RIGHT side = deoxygenated (to lungs) · LEFT side = oxygenated (to body)

⚠ Teacher: "KNOW FOR FINAL" — all labels below

Blood flow loop (memorize!):

R atrium → tricuspid → R ventricle → pulm. semilunar valve → pulm. trunk → pulm. arteries → **LUNGS** (drops CO₂, picks up O₂)
→ pulm. veins → L atrium → bicuspid → L ventricle → aortic SL valve → aorta → **BODY** (drops O₂, picks up CO₂)
→ vena cavae → back to right atrium. ► loop complete
