

Chloe's Biology Final Study Plan

Test: Friday, May 29, 2026 · 1–3 PM · North Gym · Bertram / Deasy / Seatter **Today:** Saturday, May 16, 2026 (13 days out, counting today)

The teacher already gave a study calendar in the review guide. This plan layers on top of it with specific daily content tied to the seven exam topics.

How to use this plan

- **Each day = ~20–40 minutes minimum.** That's what your teacher recommended; don't try to cram one big session and skip the next day. Spaced repetition is real.
- **Always do the "Errors / Watch-Out" callouts first** when reading the study guide — your brain remembers a corrected mistake better than a new fact.
- **The cheat sheet is only for May 28–29.** Don't lean on it earlier; it's a recall trigger, not a learning tool.
- **Flashcards = phone time.** Anytime you'd otherwise scroll, do 10 cards.

The 13-day plan

Day	Date	Focus	What to do (≥20 min)
Sat	May 16	Setup	Skim the study guide front-to-back. Don't memorize — just see the layout. Make sure all files open.
Sun	May 17	Topic II — RNA & Protein Synthesis	Read Topic II in the guide. Do flashcards (RNA section). Practice 1 transcription + 1 translation problem from quiz bank.
Mon	May 18	Topic III — Meiosis	Read Topic III. Draw the 8 phases of meiosis from memory. Watch for mitosis vs. meiosis differences.
Tue	May 19	Topic IV — Genetics (Part 1)	Mendel's laws, monohybrid + dihybrid Punnett squares. Do 3 quiz problems.
Wed	May 20	Topic IV — Genetics (Part 2)	Non-Mendelian: codominance, incomplete dominance, multiple alleles (blood type), polygenic, X-linked. Do 3 quiz problems.
Thu	May 21	Topic V — Evolution (Ch. 17)	Darwin, natural selection, evidence (homologous/analogous/vestigial). Skim flashcards.
Fri	May 22	Topic V — Evolution (Ch. 18)	Genetic drift, founder/bottleneck, 3 types of selection, speciation, cladograms. (Skip Hardy-Weinberg — teacher excluded.)
Sat	May 23	Topic VI — Ecology (Part 1)	Biotic/abiotic, levels of organization, niches, symbiosis, food webs.
Sun	May 24	Topic VI — Ecology (Part 2) + Topic I (Sci. Method)	Energy 10% rule, succession, biomes, biogeochem cycles. Also review hypothesis/variables/graph types.
Mon			

Day	Date	Focus	What to do (≥20 min)
	May 25	Topic VII — Human Body	Reproductive system (male + female, menstrual cycle, hormones). Circulatory (heart anatomy + blood flow). Respiratory (path of O ₂). Prepare your questions for Teacher Access Day.
Tue	May 26	Teacher Access Day	Go to office hours 9:30–11:30 or 1–3:30. Bring your specific questions. After: redo any problems you got wrong.
Wed	May 27	Full review — Topics I–IV	Take the quiz bank Topics I–IV like a real test. Grade yourself. Re-read anything you miss.
Thu	May 28	Full review — Topics V–VII + cheat sheet	Quiz bank Topics V–VII. Then a 15-min cheat-sheet scan. Pack: 2 pencils, eraser. In bed early — DO NOT stay up late.
Fri	May 29	TEST DAY	15-min cheat-sheet review with breakfast. Arrive at North Gym early. You've got this.

What's on the exam (from teacher's review guide)

1. **Foundational Science** — hypothesis, variables, graph types
2. **RNA & Protein Synthesis** (Ch. 14) — transcription, translation, codon wheel, mutations
3. **Meiosis** (Ch. 12.4)
4. **Genetics** (Ch. 12) — Mendel, Punnett squares, codominance, sex-linked, pedigrees, karyotypes
5. **Evolution** (Ch. 17 + 18) — Darwin, natural selection, evidence, speciation, cladograms
6. **Ecology** — organization, biotic/abiotic, energy flow, succession, niches, populations
7. **The Human Body** — reproductive, circulatory, respiratory systems

Teacher-specified EXCLUSION

From the Ch. 18 reading guide: **SKIP Evolution vs. Genetic Equilibrium and the Hardy-Weinberg Principle.** Not on the test. Don't waste time on it.

What you're responsible for (verbatim from teacher)

"You are responsible for all of the material that was discussed in class and all of the lab activities performed from the second semester."

This study guide covers everything in the slides + reading guides + worksheets that were shared. If you remember a lab or class discussion that's not in here, add a note and review it separately.

The night before

- Pack: **2 pencils + eraser**
- Bed early. The teacher said this in caps: "DO NOT STAY UP ALL NIGHT STUDYING"
- Set 2 alarms

Morning of (May 29)

- Eat breakfast with protein
- 15-min scan of the cheat sheet
- Arrive at North Gym a few minutes early
